● **RED ALERT – Extremely Heavy Rainfall & Severe Impact Risk**

- **East Rajasthan (3rd & 6th July):** Intense rainfall caused potential flash floods and localized inundation.
- **East Madhya Pradesh (5th & 7th–9th July):** Isolated extremely heavy rainfall linked to low-pressure activity.
- **Vidarbha (8th–9th July):** Received extremely heavy rainfall resulting in flooding risks in urban and rural areas.
- **Chhattisgarh & Odisha (6th–9th July):** Flood-prone zones affected due to concentrated rainfall from the low-pressure area.
- **Tripura (9th July):** Very intense downpour recorded, triggering local flood alerts.

● **ORANGE ALERT – Very Heavy Rainfall & Significant Disruptions**

- **West Rajasthan, Gujarat Region, Konkan & Goa, Coastal Karnataka (3rd July):** Very heavy spells affected normal life and transport.
- **East Madhya Pradesh, Odisha, Chhattisgarh, West Madhya Pradesh (4th–9th July):** Repeated intense rainfall associated with the Gangetic West Bengal low-pressure system.
- **Himachal Pradesh, Uttarakhand (3rd July):** Flash floods and hilly road blockages.
- **Saurashtra & Kutch (4th & 7th July):** Coastal inundation and disruption reported.
- **Jharkhand, Sub-Himalayan West Bengal & Sikkim, Tripura, Gangetic West Bengal (6th–9th July):** Isolated areas saw dangerous rain intensity.
- **Haryana, East & West UP, Assam & Meghalaya (5th–9th July):** Very heavy rainfall led to localised flooding and drainage stress.

● **YELLOW ALERT – Heavy Rainfall, Thunderstorms, Gusty Winds**

- **Widespread Regions Affected:**
 - **South India:** Tamil Nadu, Puducherry, South & North Interior Karnataka, Kerala & Mahe, Coastal Karnataka (3rd–9th July).
 - **West & Central India:** Konkan & Goa, MP, Vidarbha, Gujarat Region, Madhya Maharashtra, Saurashtra & Kutch.
 - **North India:** HP, Uttarakhand, Punjab, Haryana, East & West UP, Jammu-Kashmir.
 - **East & Northeast India:** Jharkhand, Bihar, Gangetic & Sub-Himalayan West Bengal, Assam, Arunachal Pradesh, Nagaland, Manipur, Mizoram, Tripura (3rd–9th July).

Rainfall Trends

Excess to Large Excess Rainfall observed for the second consecutive week in:

- East MP (+199%)
- Saurashtra & Kutch (+150%)
- Vidarbha (+130%)
- West Rajasthan (+106%)
- Chhattisgarh (+100%)
- All-India Weekly Rainfall Departure (03–09 July): +26%
- Seasonal Rainfall Departure (01 June – 09 July): +15%

Region	Week			Season		
	03.07.2025 TO 09.07.2025			01.06.2025 TO 09.07.2025		
	Actual (mm)	Normal (mm)	Departure (%)	Actual (mm)	Normal (mm)	Departure (%)
EAST & NORTHEAST INDIA	73.3	97.2	-25%	366.9	454.0	-19%
NORTHWEST INDIA	40.7	38.6	+5%	166.4	125.5	+33%
CENTRAL INDIA	125.6	67.0	+87%	366.8	255.1	+44%
SOUTH PENINSULA	37.1	42.8	-13%	207.4	215.4	-4%
THE COUNTRY AS A WHOLE	73.7	58.3	26%	273.9	239.1	+15%

🌐 **Large-Scale Climate Drivers**

- **ENSO (El Niño–Southern Oscillation):**
 - Neutral phase ongoing – expected to continue through the season.
- **IOD (Indian Ocean Dipole):**
 - Neutral currently; forecast suggests weak negative IOD conditions may develop.
- **MJO (Madden-Julian Oscillation):**
 - In Phase 4 with amplitude >1.
 - Expected to loop in Phase 4 and move to Phases 5 & 6, favoring enhanced Bay of Bengal convection in early part of next week.

⚠️ **Major Impacts Observed (26 June – 3 July)**

- Flooding reported in parts of Odisha, Chhattisgarh, East MP, and Vidarbha due to extremely heavy rainfall.
- Landslides and road blockages occurred in Himachal Pradesh and Uttarakhand after intense downpours.
- Urban waterlogging disrupted daily life in cities like Bhopal, Jaipur, and Bhubaneswar.
- Agricultural fields in low-lying areas of Rajasthan and Madhya Pradesh were inundated.
- Strong winds and lightning led to local infrastructure damage in Karnataka, Andhra Pradesh, and Northeast states.
- Transport delays and power outages were reported in affected districts of West Bengal and Jharkhand.
- Coastal disruptions occurred in Konkan, Goa, and Gujarat due to persistent heavy rainfall and offshore troughs.

Summary of the week

1. Heavy to extremely heavy rains impacted central and northwest India.
2. A low-pressure system over Gangetic West Bengal intensified rainfall.
3. Several regions recorded over 100% excess rainfall.
4. Temperatures stayed below normal in rain-affected areas.
5. Monsoon rainfall surplus reached +15% by 9 July.

General recommendations for the week

- Avoid travel in flood-prone and hilly areas due to landslide and flash flood risk.
- Stay updated with local weather alerts and advisories issued by IMD.
- Secure outdoor items and weak structures against strong winds and heavy rain.
- Ensure proper drainage around homes to prevent waterlogging.
- Farmers should delay fertilizer application and protect crops from excess water.

Outlook for the Upcoming Weeks

Week 1 Forecast: 11–16 July 2025

Red Alerts – Extremely Heavy Rainfall

- **East & West Rajasthan, West MP (11–14 Jul):** Risk of flash floods, crop damage, and road disruption.
- **Uttarakhand (13 Jul):** Landslides and debris flow possible in hill areas.
- **HP, Jammu, Punjab, Haryana, W. UP (10–11 Jul):** Overflowing rivers and landslides may impact transport and safety.

Orange Alerts – Very Heavy Rainfall

- **Vidarbha, Chhattisgarh, Jharkhand (11–14 Jul):** Widespread rain may cause flooding and transport delays.
- **Odisha (13–15 Jul):** Coastal districts face risk of flooding and airport/rail disruptions.
- **Gujarat, Konkan & Goa, Saurashtra (12–16 Jul):** Urban flooding and waterlogging expected in major cities.
- **Madhya Maharashtra Ghats (13–14 Jul):** Landslide and dam safety concerns in hilly regions.
- **Kerala & Coastal Karnataka (till 13 Jul):** Localized flooding and wind damage likely.
- **Strong Winds:** Gusts up to 50 km/h across Tamil Nadu, Kerala, Karnataka.

Yellow Alerts – Heavy Rainfall

- **NW India & West Rajasthan (11–16 Jul):** Daily rain may disrupt roads and power lines.
- **NE India (10–16 Jul):** Local flooding and landslides in Mizoram, Tripura, Arunachal, Assam, and Meghalaya.
- **WB & Sikkim (13–16 Jul):** Risk of catchment flooding and urban waterlogging.
- **Central & South India (11–16 Jul):** Thunderstorms with gusty winds may affect rural belts and low-lying towns.

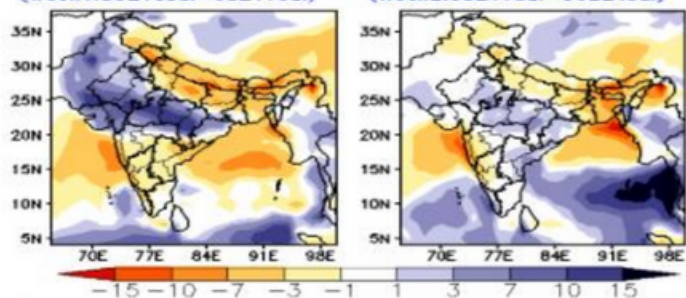

Temperature Outlook – Week 1

- **Above Normal (+2–4°C):** UP, Bihar, and NE India to face warm, humid weather.
- **Extreme Pockets (>5.1°C):** Heat stress likely in Arunachal, Odisha, Assam, TN, Puducherry.
- **Below/Near Normal:** Most of Central, West, and South India remain cooler due to rain.
- **Max Temp:** 41.0°C recorded in Madurai, Tamil Nadu.

Active Weather Systems

- **Low Pressure:** Over south Jharkhand causing heavy rain in East-Central India.
- **Monsoon Trough:** Near normal position supporting rain continuity.
- **Troughs:** From SW UP & NE Arabian Sea to Jharkhand enhancing convergence.
- **Cyclonic Circulations:** Over Punjab and NE Assam increasing rainfall intensity locally.

Forecast Rainfall Anomaly (mm/day) (00Z=0530 hrs IST)
(Week1:00Z10Jul–00Z17Jul) (Week2:00Z17Jul–00Z24Jul)

Week 2: 10-16 July, 2025

Orange Alerts – Very Heavy Rainfall

- **Central India (MP, Chhattisgarh):**
 - Frequent very heavy rainfall events expected, especially over Bhopal, Jabalpur, Raipur. Flooding and disruptions in agriculture and transport likely.
- **West Coast (Konkan, Goa, Coastal Karnataka, Kerala):**
 - Offshore trough will bring daily intense showers, risking coastal inundation, landslides in Ghat sections, and major highway disruptions.

Yellow Alerts – Isolated Heavy Rainfall

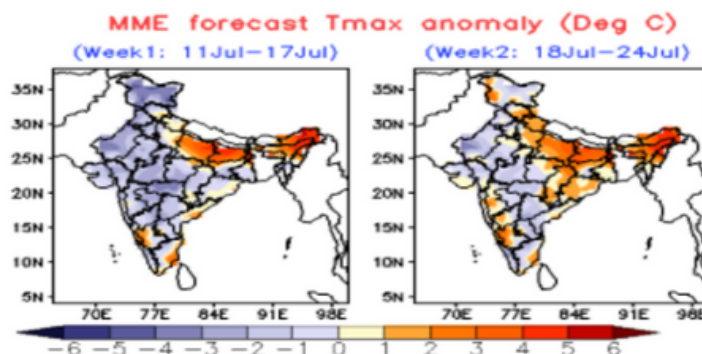

- **Northwest India:**
 - Widespread light to moderate rainfall expected with isolated heavy spells in Rajasthan, Punjab, Haryana, and western UP. Minor deficits in some zones.
- **South Peninsular India:**
 - Kerala, Coastal Andhra, Interior Karnataka expected to witness near-normal rainfall, with isolated spells possibly intense during afternoons/evenings.
- **East & Northeast India:**
 - Overall below-normal rainfall activity. Only patchy rainfall expected in Bihar, West Bengal, Assam, and Arunachal Pradesh, leading to continued dry periods.

Temperature Outlook – Week 2

- **Above Normal (+2–3°C):**
 - East India, Northeast India, Uttar Pradesh, and Western Himalayan Region likely to experience hotter than usual daytime conditions during dry phases.
- **Below/Near Normal:**
 - Central, western, and southern India to remain comfortably cooler due to regular rainfall and cloudiness.

Summary for the upcoming weeks

- Extreme rainfall to affect Rajasthan, MP, and Uttarakhand, raising flood risks.
- Flooding and delays likely in cities across Odisha, Gujarat, Konkan, and Kerala.
- Hill states face landslide threats due to persistent heavy rains.
- Strong winds over South India may impact coastal safety.
- Heat stress expected in parts of UP, Bihar, and Northeast India.
